Experiment -1

AIM: To create an AWS free tier account to provision the resources.

Description:

The aim of this experiment is to create an AWS Free Tier account to gain access to Amazon Web Services (AWS) cloud computing resources. This account will be used to explore various AWS services, provision and configure cloud resources, and gain practical hands-on experience in cloud computing. It helps in understanding how cloud infrastructure works and how different AWS services can be used to deploy, manage, and scale applications efficiently.

Steps:

Part A: Creating an AWS Account

1. **Open a web browser and navigate to the official AWS website: https://aws.amazon.com/.**
2. **Click on the Create an AWS Account option.**
3. **Enter a valid email address and provide an AWS account name (e.g., StudentAWSAccount).**
4. **Click Verify email address to receive a verification code.**
5. **Open your email inbox and enter the verification code received from AWS.**
6. **Create a strong password for your AWS account.**
7. **Re-enter the password to confirm it and click Continue.**

Part B: Providing Contact Information

8. **Select the account type as Personal for individual learning purposes.**
9. **Enter your full name and contact details.**
10. **Provide your country or region, address, city, state, and postal code.**
11. **Enter your valid mobile phone number.**

12. **Read and accept the AWS Customer Agreement.**
13. **Click Continue to proceed to the next step.**

Part C: Payment Information and Identity Verification

14. **Enter your valid debit or credit card details, including the card number, expiry date, and cardholder name.**
15. **Provide the required billing information.**
16. **Complete the payment verification process if prompted by AWS.**
17. **Verify your identity using the mobile phone number provided.**
18. **Enter the verification code received through SMS or phone call.**
19. **Complete the identity verification process.**

Part D: Selecting the AWS Support Plan

20. **After completing the verification process, proceed to the Support Plan selection page.**
21. **Select the available Free Basic Support plan for learning and experimentation.**
22. **Review the selected support plan details.**
23. **Click Complete Sign Up to finish the registration process.**
24. **Wait for AWS to activate your account. Account activation may take some time.**

Part E: Accessing the AWS Management Console

25. **Open the official AWS website.**
26. **Click Sign In to access the AWS Management Console.**
27. **Enter the registered email address and password.**
28. **Complete any additional verification steps if prompted.**
29. **After successful authentication, the AWS Management Console dashboard will be displayed.**
30. **Explore the available AWS services such as EC2, S3, IAM, and VPC.**
31. **Select the required AWS region from the region selector to provision cloud resources in that region.**

32. Verify that the AWS account is successfully created and that the required cloud services are accessible.

Output:
